Parquets

For Parquet your way.

Timeless and classic, people come back to parquet again and again. So, our updated Spacia collection has the biggest selection ever of 74 parquet options in two sizes for you to play with. Naturally there's the traditional wood designs. But for a really contemporary vibe, we now have stone parquet options in the subtle new Tones palette (p31) and in Spacia's four elegant marble designs (p29).

Concrete Pale	AROSCN30
Modernist Frame	AROAMN30
Polished Copper**	AROAPL45
Polished Gold**	AROAPL78

Acoustic backing is not available on stripping

**Straight Grain only

Acoustic

Amtico Acoustic
Turn great looking places
into **great sounding** spaces.

18_{dB}

Specify on demand

Amtico Acoustic is applied in production, removing the need for additional underlay. It enhances the acoustic properties of Spacia LVT by reducing impact sound transmission by up to 18dB and also provides an extra level of underfoot comfort.

Optional Acoustic backing can be specified on all Spacia products except Heritage Oaks and patterns requiring stripping.

What silence looks like.

Learn how we can solve sound transmission issues in your next project

Enhanced performance and protection

Clearly superior resistance.

Flooring fit for the future.

Amtico Bio is our first bio-attributed LVT flooring. Made with renewable biomass derived PVC, which saves more than 90% of the CO₂ emissions compared to traditional fossil fuel based PVC. Amtico Bio offers the same performance and finish with a reduced carbon footprint. We use carefully selected and audited sources of biomass to create the renewable ethylene that goes into our bio-attributed PVC. This includes by-products such as Crude Tall Oil (CTO) from trees and Used Cooking Oil (UCO).

Spacia is available to specify with 42% bio-attributed content.

36+ slip resistant planks and tiles.

Made to the same exacting standards as standard Amtico LVT, Spacia 36+ gives you the performance of slip resistant sheet but with the enhanced design possibilities that LVT planks and tiles bring.

Add an extra level of safety to your next project with our high-performance slip resistant flooring.

Specify Spacia 36+*

ENHANCED SLIP RESISTANCE

Amtico Antimicrobial protection.

Spacia is specified with integral, antimicrobial protection.*

We add an ionic silver additive to the urethane coating that provides a hygienic surface where bacteria and viruses will struggle to multiply or survive. Embedded antimicrobials are not designed to replace cleaning and disinfection, but to provide an additional level of protection between regular cleaning cycles in high traffic spaces.

This means Amtico Spacia brings an extra level of defence, giving you peace of mind between cleanings.

24HR PROTECTION**

*All products, except Heritage Oaks, are available in our high-performance 36+ slip resistant flooring and with our antimicrobial protection.

Highball, Stucco Putty stripping – Uniform Tile

**Independently verified against E.Coli and MRSA, to ISO 22196, showing a reduction of >99.9% after 24hrs. Also tested against SARS-CoV-2, to ISO 21702, showing an 85.5% reduction after 24 hours compared to an untreated control, and a reduction of >99.9% against the initial inoculation.

Laying Patterns

Spacia's flexible plank and tile sizes create floor designs that are simple to specify and easy to install.

“The showroom’s previous floor was not fit for purpose, so durability was a key factor when choosing a replacement. With an established relationship with Amtico on our exhibition displays, we know the quality of the products. By using the Spacia collection in the oak and concrete shades, it really helps to complement Smeg’s semi-industrial look.”

John Davies, Head of Marketing
Smeg UK

Accreditations

Our ethos is to combine creativity and innovation with the highest levels of quality – design, manufacturing, product and service.

View our technical information on our website.

	Amtico Spacia has been certified to achieve the M1 building materials emissions classification for indoor air quality from the Finnish Information Foundation RTS.		Amtico Spacia products have been UPEC classified, therefore conforming to local French certification.
	Amtico is a member of the professional association for flexible floor covering manufacturers in Germany.		The CE mark is a confirmation by Amtico that our products are in compliance with European health, safety and environmental requirements (as required by Council Directive 89/106/EEC and detailed in EN 14041).
	Our quality system complies with BS EN ISO 9001 and is certified by LRQA.		The UKCA mark is a confirmation by Amtico that our products meet the UK Regulations as defined in the relevant Statutory Instruments (SIs).
	Amtico Spacia products are third-party certified for low-VOC emissions contributing towards good indoor air quality.		Amtico International GmbH is a member of the DGNB German Sustainable Building Council.
	Amtico Spacia products are manufactured using ortho-phthalate free plasticisers.		Our environmental system complies with ISO 14001 and is certified by BSI
	Amtico Spacia complies with Indoor Air Comfort Gold version 6.0 and is certified as a low-emissions product contributing to a healthy indoor environment.		Amtico International are proud to be affiliated with the Valobat Eco Organisation, whose objective is to collect and organise the end of life cycle of Amtico products in France.
	Amtico International is a member of the European Resilient Flooring Manufacturers' Institute.

Visit amtico.com for more information on our product range, inspiring ideas, maintenance and installation advice. Every effort is made to achieve accurate reproduction of products in this brochure, however printing limitations can be misleading. Selection of products should be made from actual samples. Samples are small pieces cut from standard tiles. They give only a general indication of the design. Tone and shading can vary slightly from batch to batch and it is not possible to guarantee that the sample will exactly match the material supplied. The policy of the Company is one of continuous development and improvement and the right is reserved to add or delete from the range or change patterns without prior notification. All metric sizes are rounded. All products are manufactured in line with EN ISO 10582, EN13845 and EN651. Brochure correct at the time of printing.
