

PERFECT LIGHT
ANYWHERE

ABOUT LUCTRA®

LUCTRA® is the brand for good working light in the office or at home.

Our goal is to provide every user with the best possible light anywhere at any time. Light which not only illuminates, but promotes alertness, higher activity levels and restful sleep for its users. We are all unique so LUCTRA® gives each user the ability to adjust their lighting exposure according to their own personal needs.

We are a diversified international team of individuals. We are all experts in our own fields but we all work together as a team. Our challenge is to integrate our different approaches and expert knowledge into a well-functioning overall concept. What unites us is our passion for this product and the knowledge that with LUCTRA® we are offering genuine added value.

LUCTRA® is a brand of the long-established company DURABLE, which has been dedicated to professional work for almost a century: to its organisation, its processes and its tools. We believe it would be hard to find a company with more experience in this field.

BEST LIGHT FOR WORK

LUCTRA® has set out to provide the best possible working light.

No matter where you are – light is one of the most vital factors of daily life. Light makes things visible. It helps us with our daily work. Good light illuminates things, but scientists discovered long ago that it can do much more. Good light ensures a well-balanced daily rhythm, it makes us happy, successful and even slim. It sounds far-fetched but it's true! Good light supports both periods of activity and periods of rest. Good light ensures sufficient sleep and everything else falls into place almost automatically. The best light is natural sunlight but for those who can't get enough of that every day, there is biologically effective artificial light.

Light provided by innovative LED technology and presented in a timeless, award-winning design, which can be flexibly adjusted to individual needs and operated intuitively as well.

May we introduce LUCTRA®.

DESIGN AND SUSTAINABILITY

Design

Excellence and quality were in the foreground of our design process. Using high quality materials with a crystal clear interface, LUCTRA® translates complex technology into an appealing design.

From the beginning, LUCTRA® has not compromised on this and has made a clear statement through its stringent implementation of sophisticated functions, user-friendly operation and use of selected materials crafted with precise workmanship. The LUCTRA® lighting range is an intuitive enhancement to the workplace in terms of function, style and operation.

Sustainability

Every LUCTRA® lamp is hand-made in Germany. There at the LUCTRA® factory, highly qualified employees install all the parts for the entire product range. Our top priority is to handcraft products that meet the highest quality standards.

We have given preference to regional suppliers. The materials we use are all recyclable. To consistently implement our sustainability mission we also take responsible actions to preserve our environment.

“Made in Germany” is a quality claim in many respects.

TABLE LAMPS

LUCTRA® table lamps provide the best possible lighting conditions for any desktop whether that is at home or at a designated place of work. They are available in two different models with varying functions and two different lamp head designs - straight-lined linear and rounded radial.

Self-locking joints allow the lamp to be moved to the desired position smoothly and easily and can withstand up to 50,000 hinge movements without readjustment. Various fastening options are available which guarantee a secure placement on the desk and also help to save desk space if necessary.

TABLE PRO LINEAR/RADIAL

Operation	via VITACORE® electronics or app
Colour temperature settings	freely adjustable between 2,700 K and 6,500 K
Lighting intensity settings	freely adjustable up to 1,000 lux at a height of 75 cm
Luminous flux	neutral white 680 lm Boost 900 lm
Boost function	for maximum cold-white light
USB charging ports	2 ports
Height	300 – 900 mm
Article number with lamp base	9215 (Linear)/9216 (Radial)
Article number with clamp	9217 (Linear)/9218 (Radial)
Article number with pin	9219 (Linear)/9220 (Radial)
Colours	
	01 black
	02 white
	23 aluminium

TABLE LINEAR/RADIAL

Operation	via VITACORE® electronics
Colour temperature settings	3 levels – 2,700 K/3,600 K/6,500 K
Lighting intensity settings	5 levels – up to 1,000 lux at a height of 60 cm
Luminous flux	neutral white 680 lm
Boost function	-
USB charging ports	-
Height	300 – 750 mm
Article number	9201 (Linear)/9202 (Radial)

FLOOR LAMPS

For those who like a minimalistic approach to their work space, LUCTRA® floor lamps provide the ideal solution. Offering the same premium LED technology and individual light setting functions, LUCTRA® floor lamps provide direct and indirect lighting to ensure all users get the right biologically effective light. With a choice of one or two lamp heads in two different designs,

LUCTRA® floor can be used individually or in greater numbers to light an entire space. Two integrated USB connections provide a recharging point for smart phones and tablets directly via the lamp. Simple and convenient meaning you can keep everything in view at your workplace.
