FSC® and PEFC™ are independent forest certification schemes. Both organizations work globally to promote legal and sustainable forestry, in order to secure nature, humans and resources.

Sustainability, Environment and Quality

In a global world, it is not enough for Junckers to improve itself continuously on a local level. We always try to ensure legal and sustainable forestry, and consequently, sustainable products, more effective energy utilisation and good working conditions. We do this through our subsidiaries, as well as by trying to influence our customers, suppliers and society on a broader scale.

In 1930 – long before it became trendy or politically correct – the young forester Flemming Juncker searched for ways to utilise and preserve one of our most valuable resources: the forests. At that time, there was very little focus on the environment and sustainable forestry. When Flemming Juncker implemented his ideas about care and sustainable utilisation of the forests, his company and the beautiful Junckers floors were born.

Junckers utilises 100% of the forested timber. Junckers is an energy-intensive industry using substantial volumes of energy for the drying and processing of wood. Junckers' residual wood (sawdust, wood chips, saw-cut log ends and other residual wood from the production) is supplied to a wood-fired power plant, which in return supplies electricity to Junckers and the Danish national electricity network.

As wood is considered CO₂-neutral material and because Junckers generates more energy than the business itself can consume, the energy surplus is used to produce CO₂-neutral electricity, which benefits society. That makes Junckers a CO₂-neutral company!

At Junckers, we believe in sustainability and we support initiatives that improve environmental awareness. Complying with environmental legislation and environmental regulations is paramount to us and in areas where we see further possibilities of improvement, we strive to do more. We co-operate with internationally recognised certification schemes, such as FSC®, PEFC™ and others.

More use, less waste, mindful forestry

People thrive on solid wooden floors

Maritime Museum, Denmark

BRUSHED OAK

ALLERGY FRIENDLY
Junckers lacquered and oiled floors comply with the demands of the Danish Indoor Climate label, and Junckers was the first manufacturer in Denmark to achieve this approval from the Danish Technological Institute.

Free of insecticides
Allergy friendly
Cleans easily

Indoor Climate

All Junckers wood floors and selected wood-care products have received the Danish Indoor Climate Labelling. A product with this labelling has undergone extensive degassing and odour tests. This ensures that there are no chemical substances in the flooring which adversely affect the air quality in the room.

Junckers also complies with REACH (Registration, Evaluation, Authorisation and restriction of Chemicals), REACH is an EU legislation containing a uniform set of rules and shared registration of substances used. The objective of the REACH regulation is to implement a high level of protection for human health and the environment.

Select your style

No two trees in the forest are the same. Neither are two cuts or two finished boards. Each plays its own lyrical tune of grains, knots and colour variations, composed by weather, seasons and forest wildlife - the very challenge and charm of working with wood. At Junckers you will find the wood graded into three classes, depending on the character.

JUNCKERS WOOD CHARACTER OPTIONS :

A very even colour and uniform appearance

A natural appearance with more colour and grain variation

A rustic look with lots of graining and colour variation

PREFINISHED FROM THE FACTORY

Junckers floors are normally delivered pre-finished with oil or lacquer and are ready for immediate use.

Or you can choose a raw surface if you prefer to treat your floor yourself after installation.

OIL

Junckers oiled floors enhance the natural glow of the wood and provide a naturally soft, authentic surface that is both durable and easy to maintain.

SILK MATT LACQUER

Junckers silk matt lacquered floors enhance the glow of the wood and provide a strong and highly durable, easy-to-clean surface, suitable for the busy family or high-traffic areas.

ULTRAMATT LACQUER

Junckers ultramatt lacquered floors combine a very natural matt appearance with the highly durable, easy-to-clean surface.

UNTREATED

The raw surface of the wood requires treatment with one of Junckers professional oils or varnishes before use. Our products are water-based, easy to use and gentle on the environment.

Junckers Collections

The floor is the first piece of furniture in a room. It sets the basic atmosphere and influences all other design elements. Real quality and beauty in the floor will lift and enhance the entire space and with the Junckers floor collections you have the creative material to make it exceptional.

Junckers' solid hardwood floors combine nature's durable charm with perfect design freedom. Set out in three strong collections, the following pages are filled with an inspiring choice of first-class hardwoods, contemporary colours and multiple state-of-the-art finishes and styles, which you can combine at will.

The possible combinations are innumerable and if that's not enough, our experienced technicians and designers will be ready to work with you on specific creative ideas. Irrespective of whether you go with a simple and Nordic style, something lavishly exotic, or you can't resist one of our bold and bright colours, it will be just your floor. No copies.

BEECH CLASSIC

Museo de Bellas Artes, Spain

NORDIC ASH VARIATION
The Loft 25, New York

Ash has a very fine, light expression with a characteristic grain structure. Over time it attains a golden tone. Ash grows naturally in mixed wood forests.

SYLVAKET - Based on beech Junckers has created a product that has been vacuum stained to achieve a warm honey brown colour throughout the full thickness of the floor board.

Hotel 11 in Gothenburg, Sweden
Beech SylvaKet 2 strip Harmony, oiled

Private house, Singapore

Along with ash and oak, beech is one of Europe's widespread hardwood species spreading from Norway to Spain. The strength properties of the wood in combination with a uniform structure with yellowish white to reddish sapwood and red-brown grain pattern provides a light and classic floor.

OAK HARMONY

Oak is extremely tough, durable and forgiving, making the wood exceptionally well suited to flooring. The structure is distinct in golden nuances and ages gracefully to a deeper glow.

BLACK OAK HARMONY

Hotel, The Setai, 5th Avenue, New York

BEECH, OAK, BLACK OAK, SYLVAKETA AND SYLVAREDA

Shopping Mall, Vasco De Gama Lisboa

BLACK OAK VARIATION

Douglas Entertainment, Copenhagen

Black Oak was originally a natural product of the forest - In former days black oak occurred when an oak trunk had rested a few hundred years in marshland. A natural process turned the wood black. Junckers has recreated the distinct, exclusive expression through a unique full thickness vacuum dyeing process.

Designing your space with Junckers

A solid wide board floor from Junckers is an investment that is likely to add permanent value to any building, but most importantly, it should enhance your space and everyday life. It adds pleasure yet be out of mind. To achieve a result that matches your dreams in terms of both design and functionality, you need to get a number of details right. Simply draw us into your project, the earlier the better. We will be happy to share from our extensive third-generation experience and technical knowledge and assist you closely through the phases of design, technical detailing, installation and maintenance. That way you can avoid costly pitfalls and enjoy all the benefits of an exceptional Junckers floor - year after year after year.

REAL SPICYPEPPER AND REAL RAW SUGAR

TEXTURED SURFACE

Junckers' unique, textured oak floors have an attractive, distinct surface that is produced via a special hard-brushing technique developed by Junckers. By removing the softer sapwood from the upper surface of the wood, the tougher and darker heartwood is raised, showing off the lively grain structure in a silky-soft surface.

TEXTURED WITHOUT COLOUR

Brushed surface without colour is available as untreated, with a clear oil or lacquer on:

14 mm and 22 mm Oak, Ash and Black Oak in Harmony

OAK DRIFTWOOD GREY

JUNCKERS SIGNATURE COLOURS

Perhaps you want to tell a specific design story, create an exact atmosphere, replicate a colour from other interior design elements - or you may need to observe specific brand guidelines in your floor design. If so, Junckers is open to work with you on creating the precise colour that bears your signature.

CAPITAL ONE SAN FRANCISCO, USA - ASH VARIATION

SHIPS DECKING

Junckers ships decking

Wood is a living material that changes slightly with the seasons. During summer periods of high humidity, the floorboards will expand a little, just as they will contract during winter and dryer seasons, leaving small, natural gaps between them. This is the innate natural character of wood. However, with Junckers Ships Decking System, neoprene strips between the boards will absorb the movements, so that the floor will look the same all year round. More than that, the visible strips will create a robust, maritime feel and enhance each board for a spectacularly elegant and harmonious floor, similar to planks.

Underfloor heating and 3 ways of installation

Clip System

QUICK, EASY AND SHALLOW IN ELEVATION

Junckers' unique Clip System makes it possible to fit a solid floating floor directly onto a screeded or wooden base, with no need for battens. This laying method works perfectly with underfloor heating and is excellent for reducing impact sound into rooms below.

Glued floor

ROBUST SOUND AND FEEL

Junckers floors can be glued down to any base, including screed and wooden materials, using the unique and environmentally friendly Junckers Parquet Glue. Based on silicone, the glue also serves as a moisture membrane. A glued floor provides a very robust and solid feel, reducing the sound underfoot within the room plus it allows you to lay the floor in creative patterns.

Battens

STRONG INSTALLATION WITH SPACE BELOW

Our 22 mm floors are structurally strong. They can be nailed to battens and joists, to level out the floor.

This gives plenty of space for pipes, cables, insulation, underfloor heating and other technical requirements to be placed underneath the floorboards.

MAPLE
Electric Ballroom, England

Design freedom without pipes and heaters

Underfloor heating is an economical, luxurious and very elegant solution without visible pipes and heaters. It works to perfection under Junckers floors because, unlike tiles and stone, solid wood is naturally warm and pleasant, whether or not the heating is on. The result is not only a treat under bare feet, but also a comfortable, even room temperature.

Water-based underfloor heating is generally suited for residential and commercial buildings, while electrical systems are ideal for minor renovations. The unique Junckers Clip System enables the Junckers floor to be floated over most modern underfloor heating systems, fitted within a screed subfloor. Alternatively, the underfloor heating system can be placed between battens or joists with the Junckers boards nailed over the top.

The perfect finish

Junckers oils and lacquers

Using Junckers professional oils and lacquers, you can create the exact look and surface quality that you wish. Use a discreet finish to let the wood speak for itself or create a distinct look with a surprising colour or finish. Junckers oil and lacquer products are water-based, easy to use and produce a professional and durable result. And should you ever have a change of heart, our solid floors can be sanded again and again, allowing you to start all over with a fresh design idea.

Junckers daily care

A Junckers floor is easy to clean, thanks to the professional quality and finish. By sweeping or vacuum cleaning your floor, you will remove ordinary dust and dirt. If the floor is stained and dirty, damp cleaning will restore your floor to perfection. To keep your floors looking stunning and even to grow more beautiful, always use Junckers professional cleaning and care products, designed to nourish and treat the wood while you clean.
