

## Product notes

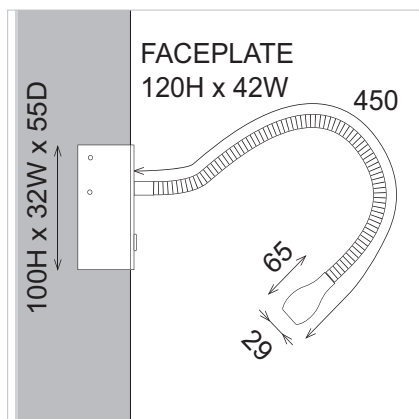

Flexible energy efficient LED bedside reading light. Ideal for use as a task light either side of a bedhead.

Voltage input	230v
Wattage maximum	1w
Lumens	40Lm
Efficacy	40Lm/w
Source type	LED
Product type	Double insulated
IP rating	IP20

## Installation notes

- Connection** - Feed mains voltage cable to required location.
- Installation** - Position the gear tray in the installation wall at the desired height. Fix to wall and connect mains voltage cable to product gear tray. place product over wall plate and fix to complete.
- Qualified electrician** – All electrical works to be carried out by a qualified electrician.
- Positioning** – Positioning is subject to interior and installation requirements. Placement guides are available for a limited number of products. Guides can also be discussed with the design department.
- LED lamps in hot environments** – LED lamps should be positioned away from heat sources such as heaters, under floor heating, saunas etc. LED's will prematurely expire if in sustained contact to heat.
- LED colour shift** – Please be aware that all LED's will appear to have a slight colour shift when located in close proximity to each other and when placed in stark white installations.

**PLEASE NOTE:-**These notes are for guidance only. John Cullen accepts no responsibility for any installation using the above notes and the final decision on installation remains with the installer.
