

# BATHROOMS GO HIGH-TECH

CROSSWATER LAUNCHES NEW DIGITAL RANGE

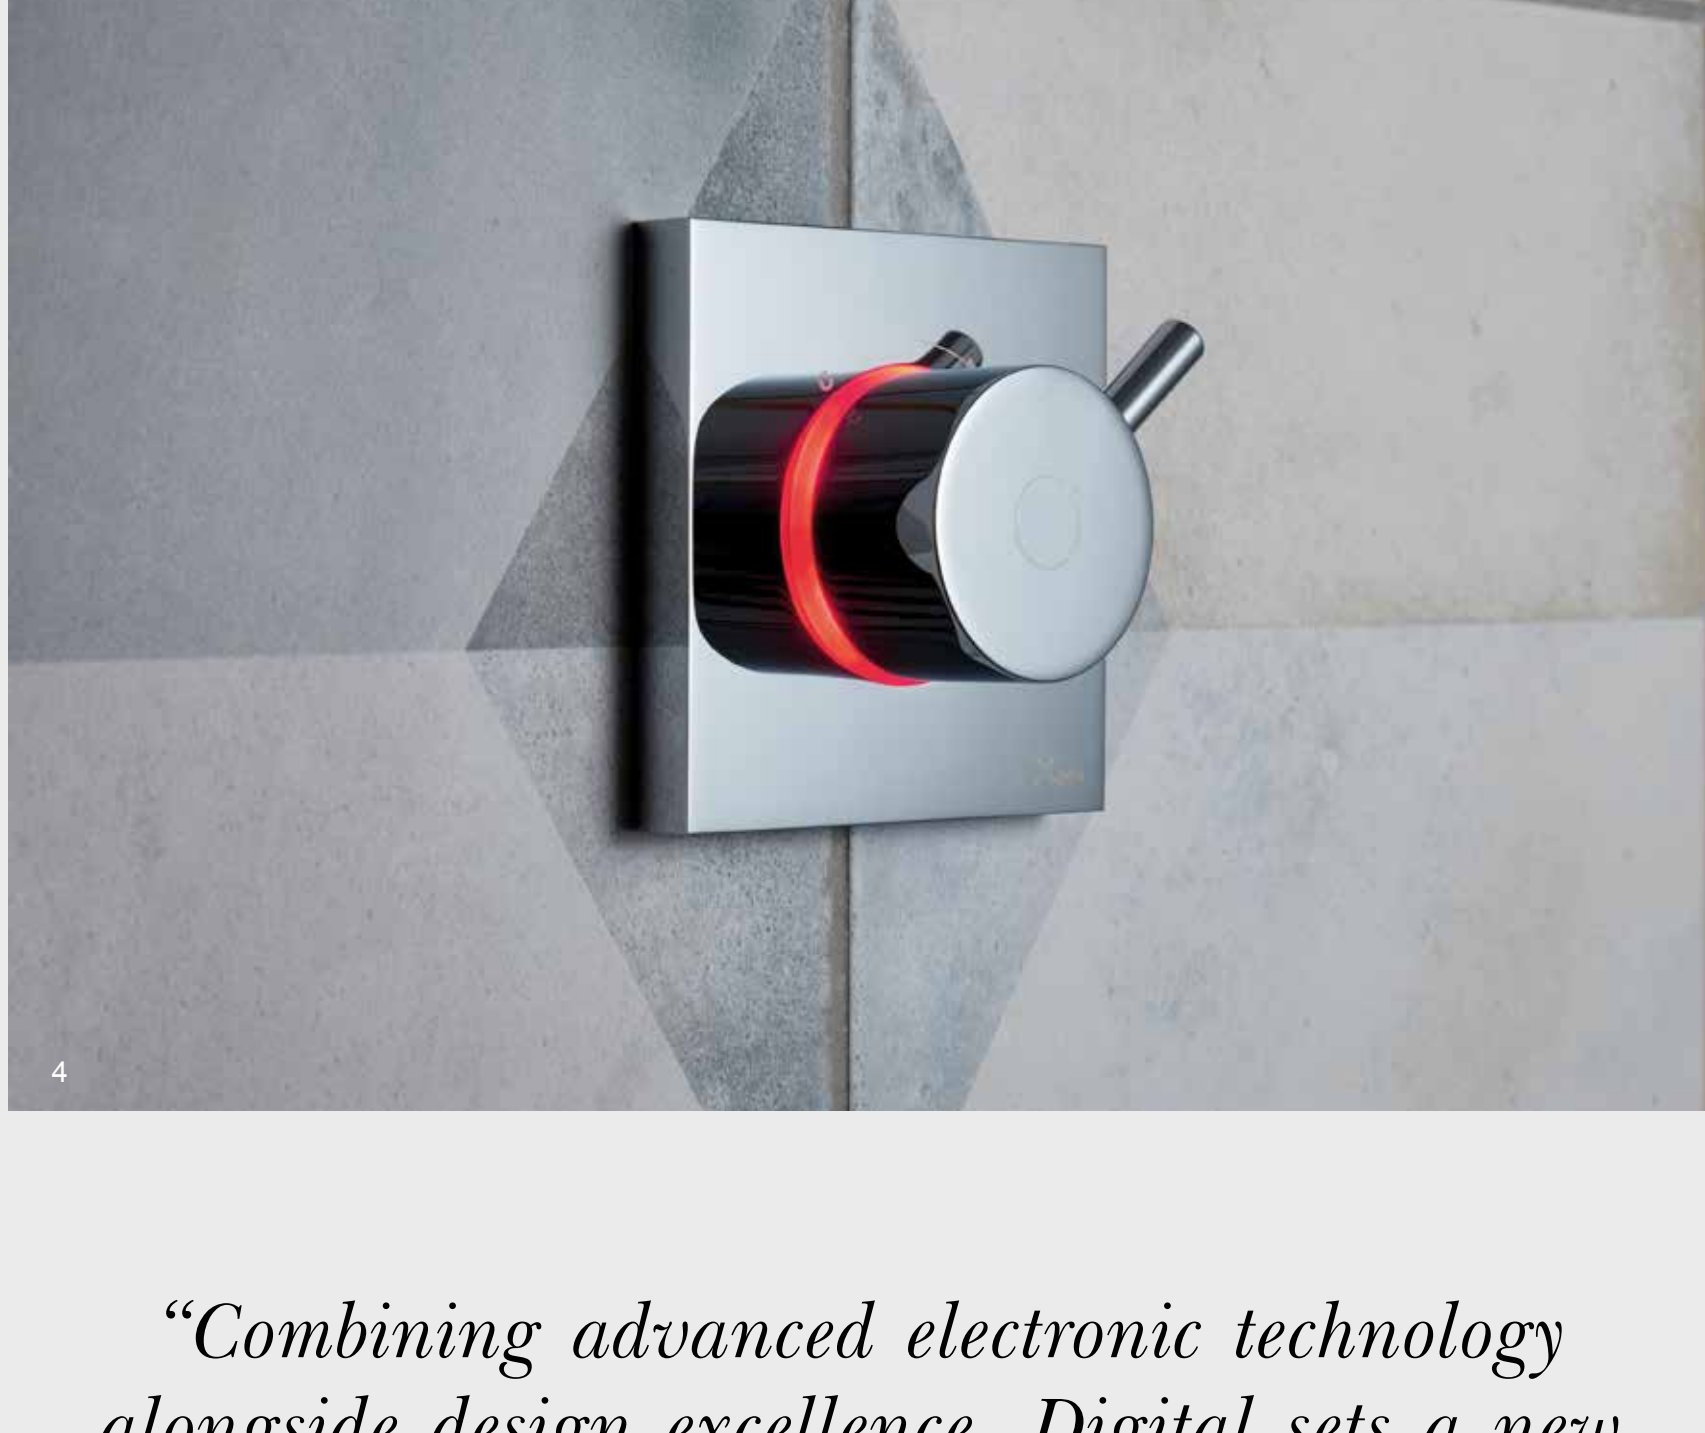

New from Crosswater, Digital is the latest in automated bathroom technology. Transforming everyday bathing into an extraordinary experience, Digital is a highly responsive, integrated system that allows you to precisely control the flow and temperature of your water at the touch of a button. Combining advanced electronic technology alongside design excellence, Digital sets a new benchmark in bathroom automation. Cutting-edge operational facilities allow for remote and multifunctional control of both shower and bath, whereby individual outlets can be programmed to each user's specific requirements, including temperature, flow and on/off functions.

Smart on the inside, Digital has been created to offer complete water control. Behind the scenes it is intuitive, high performing and effortlessly easy to install; vivid colour-changing indicators let you know when the water has reached optimum temperature to help avoid uncomfortable hot / cold water surges. When the softly-lit LEDs stop flashing and glow white, the water has reached your pre-programmed bathing preference. On the outside, Digital is beautifully crafted in polished chrome-plated brass and offered in two distinctive styles. Choose from the contemporary Kai trim featuring angular lines and sleek, fuss-free controls, or for the more traditional bathroom, Belgravia, which displays classic ceramic indices and elegant period-style profiling. Crosswater's Digital range includes both high and low-pressure systems, as well as single and dual outlet valves for multifunctional shower and bath control. An optional control pad is also available, which can be positioned up to 10m away from the source for a truly remote bathroom experience.

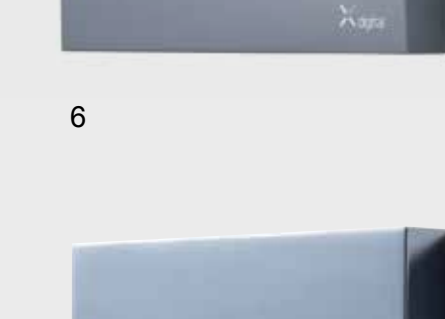

**Digital will be available to purchase from retailers nationwide from January 2017**

## KAI DIGITAL

*Clean and understated, Kai is perfect for the contemporary bathroom*

*“Combining advanced electronic technology alongside design excellence, Digital sets a new benchmark in bathroom automation”*
