The basic HI-MACS® material is identical for every colour, although darker hues have a higher percentage of natural pigments. There may be some slight variation in colour between the illustrated and actual colours due to printing techniques. The recommended finish for kitchen worktops is semi-matt. Due to specific characteristics and properties of the Marmo colours, which have a random veined effect, special consideration has to be taken into account with jointing and the use of coved up-stands. Veining may vary from sheet to sheet.

# Resistant for your benefit.

HI-MACS® is extremely hardwearing and durable and transforms your kitchen throughout the day into a universal function room.
