

SOLID WOOD SINGLE STAVE FLOORS

JUST YOUR FLOOR. NO COPIES

Akkis Art Gallery, London
Oak

The floor creates
the room *You create the floor*

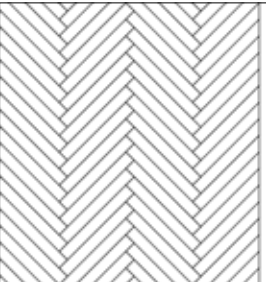

Private apartment, Copenhagen
Oak

The floor impacts on the feel of a room more than any other design element. You can go subtle to let other features dominate, or you can choose to make a bold statement. Genuine solid single stave blocks in plain or intricate patterns tell a story of timeless, luxurious elegance, exclusive taste and places of power. While a floor like that will naturally build up any classic interior, it can just as well make a stylish statement contrasted with modern architecture and minimalistic design. The story is yours to continue. Make it subtle or bold, but never boring.

classic parquet **stave** patterns

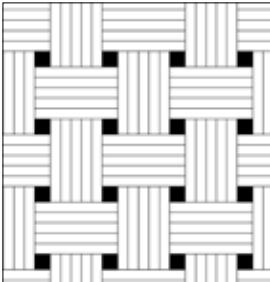

Each of the classic solid single stave block patterns combined with different types of wood will create a unique expression and provide an exclusive feel to your room. The patterns can be used across the entire floor or in various combinations to create friezes and frames. for instance to define a sitting area. Of course, we will also be pleased to help you with a specific pattern of your own design.

Single herringbone

Oak	•	•	•	•	•	•
Black Oak		•	•	•	•	•
Merbau	•		•	•	•	•

Oak
Oak is characterised by being strong and hard-wearing and at the same time having a clear and interesting grain structure. The warm and robust wood has the colour of ripe wheat and is extremely suitable for flooring. Over time, the natural ageing gives the wood a golden glow.

Merbau
The fresh timber is yellowish but on exposure to light the colour changes to a beautiful reddish brown shade which darkens gradually over time. The exclusive Merbau has immense strength properties and it gives you a floor for life with its classic elegance.

Black Oak
Black Oak recreates the apperance of the much sought-after “bog oak” where ancient oaks preserved beneath peat bogs for hundreds of years emerge with a similar “through and through” black colour.

solid single stave

From **raw beauty** to polished elegance

Junkers floors are delivered unfinished, so you can select your preferred surface treatment. Junkers professional surface treatment products guarantee you a very hardwearing and exclusive floor with minimal maintenance. Each type has its own individual expression:

Junkers oil and water-based seals
Elegant, lasting glow combined with high resilience and easy maintenance. From matt to shiny gloss.

Junkers foundation and finishing oils
Ideal floor treatment that generates exclusive glow, depth and hardwearing strength. You can apply our seals on top for even higher resilience.

Junkers PROFESSIONAL hardwax oil
Faster to work with than traditional oils this treatment has better water-repellent properties for a stain-free surface. Scratch resistant and possible to patch-repair.

The luxury of under-floor heating

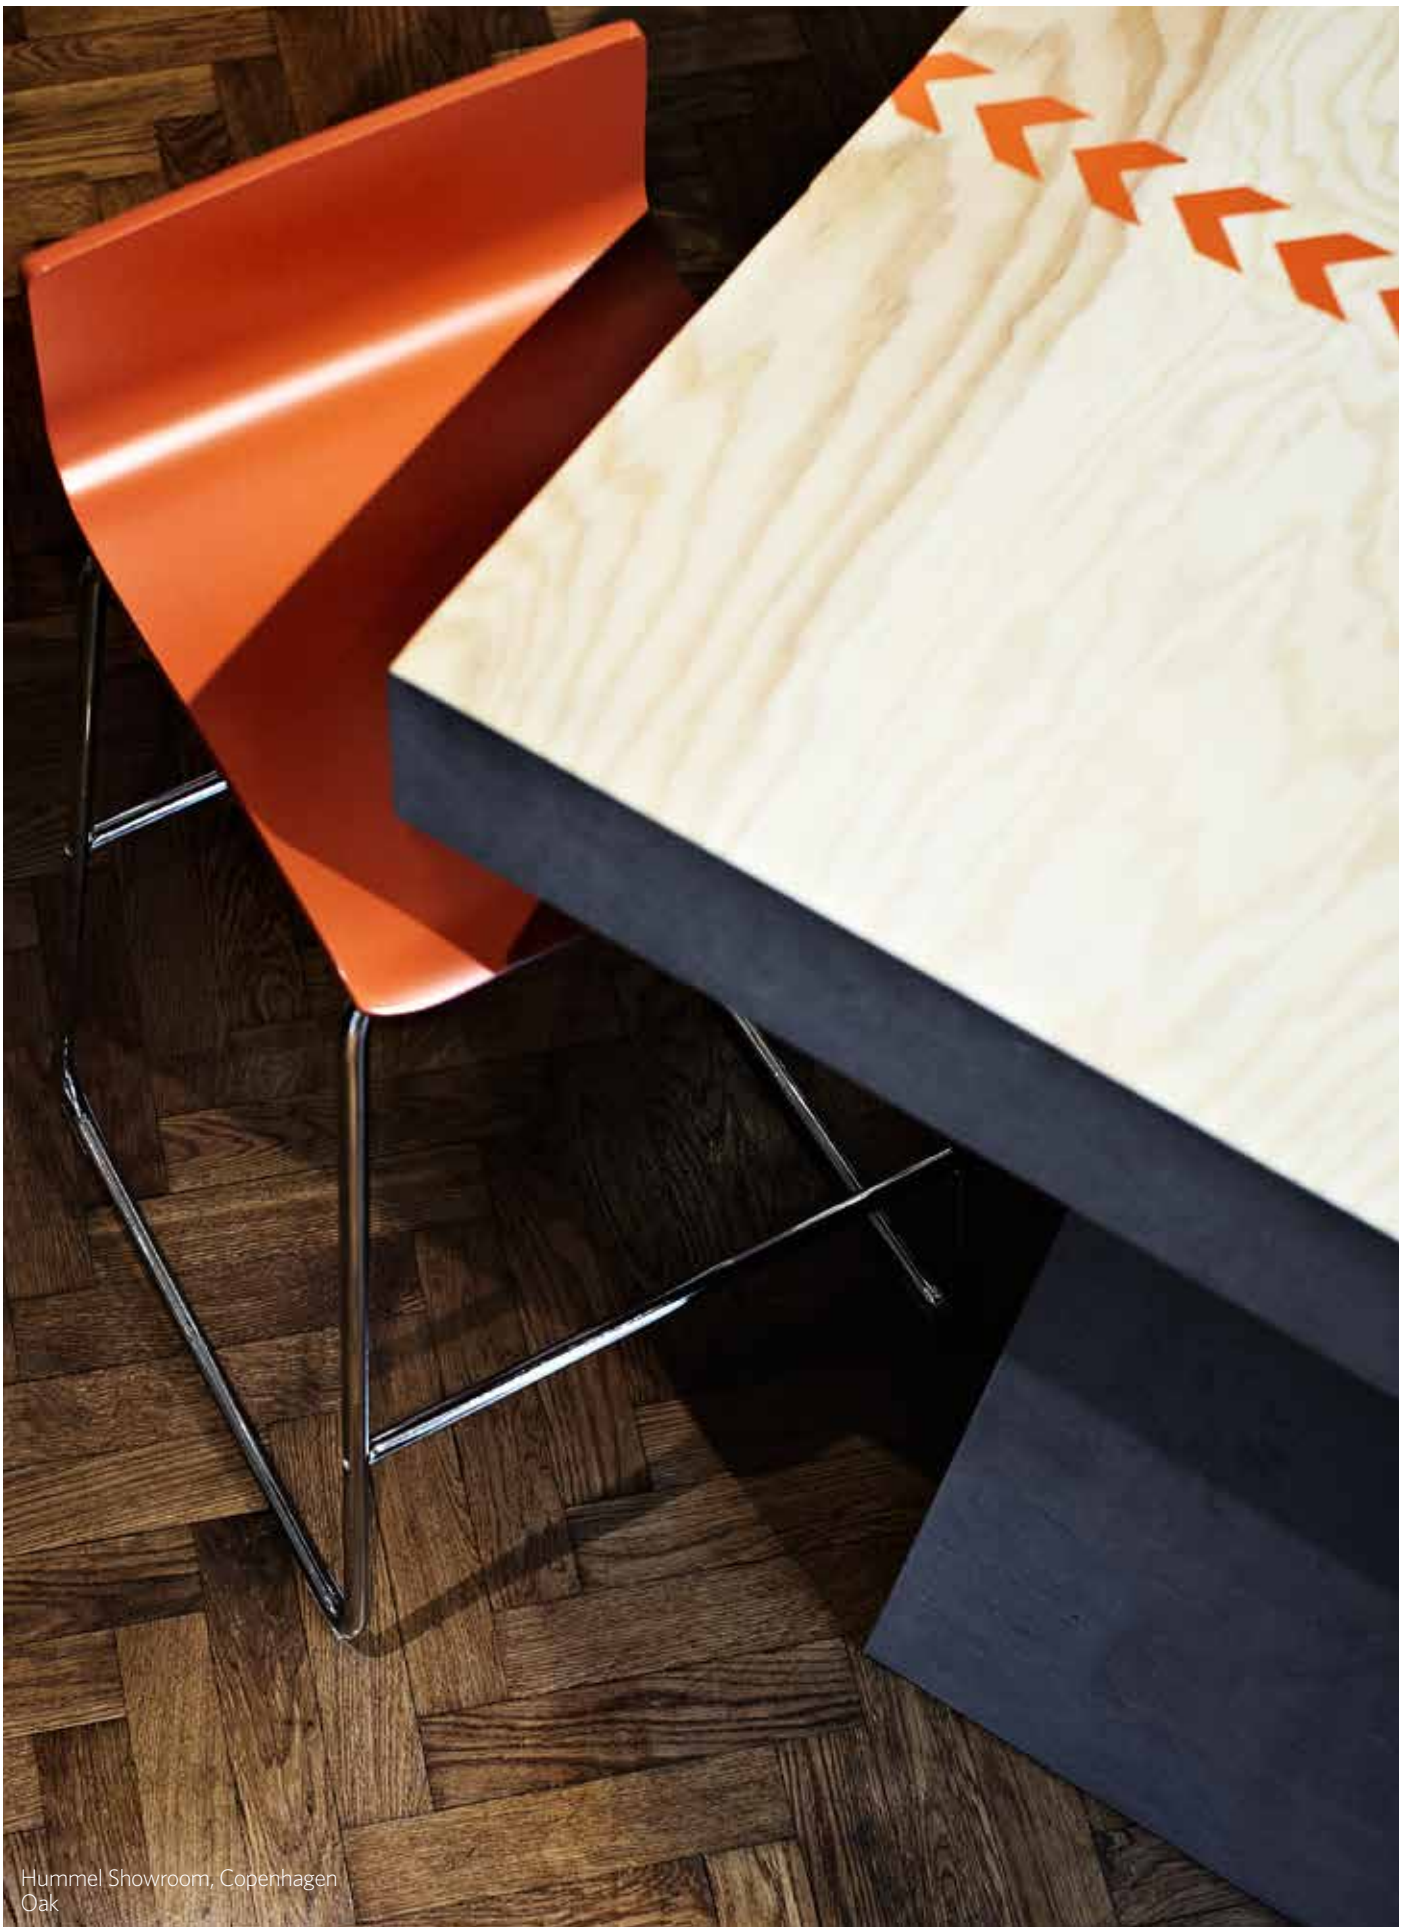

Under-floor heating is both economical, extremely comfortable and a very elegant solution. Contrary to tiles and stone, wood is naturally warm whether or not the heating is on. Causing minimal heat fluctuations, solid wood is the optimal choice for under-floor heating.

A floor every bit as **individual** as you are

Our solid single stave blocks will bring an exclusive feel to any space. Each unique stave stems from a tree individually shaped and aged by weather, seasons and forest wildlife for the best part of a century. Depending on the choice of wood and pattern, your floor will be a delightful statement of your personal style and taste: There will be no copies – just your floor.

At Junckers we are as uncompromising in our standards to our customers expectations. We seek out the best wood, then use refined processing techniques to preserve its natural qualities, so that you can enjoy an aesthetic and hardwearing floor, which is still supremely practical to live with. Over time, your solid single stave blocks will simply grow more interesting and charming in character.
