

# Smoothie Data Sheet

### Specifications

Plate Material	304 Grade stainless steel
Finish Applied on Plate	Electrophoretic Prime Paint (Primed for Painting)
Single Plate Dimensions	91.2mm x 91.2mm
Twin Plate Dimensions	153.6mm x 91.2mm
Screw Type	N/A
Plate Prefix	FS
Standard Insert Trim Colour	White or Black

### Standard Brochure Items

	Product	Description	Plate Size	Wall box
	18.1	1 GANG 13 AMP UNSWITCHED SOCKET	91.2 x 91.2mm	Smoothie single wall box
	18.2	2 GANG 13 AMP UNSWITCHED SOCKET	153.6 x 91.2mm	Smoothie double wall box

### Bespoke Accessories

Focus SB can produce and manufacture bespoke accessories including combination plates to meet your exact requirements in this range. Please contact one of our product consultants for further details.

### Fitting of Products

All electrical products must be fitted by a fully qualified electrician, failure to adhere to this voids any warranty on the products.

### Installation Instructions

Each grid, with the electrical insert assembled, is numbered and must be used with the correspondingly numbered wall box. They would normally be supplied assembled together.

The front plates will be provided in a primed condition for customer finishing as required.

The grid can be screwed back in the box and covered with **the supplied discard-able perspex sheet to offer** protection from the plastering, or, as it will have to be wired in, be removed completely as long as it is returned to its' correct box. The four screws must be removed in a uniform manner so as to not distort the grid plate.

It would normally be expected that the perforated plastering ring would be laid on top of the rendering and the wall box carefully screwed back to the wall without any undue distortion of the frame.

The final top coat of plaster would then be applied making sure it is forcibly applied close to the aperture so there is a good bond to the ring.

The plaster can be either cut back, accurately, so it is level with the top edge of the stainless steel ring, or, over plastered and sanded back until the ring just appears.

The insert can now be wired up and the complete grid assembly re-fitted to the box. Please make sure the dished washers are fitted correctly.

All four screws of the grid must be screwed in, in a uniform manner to avoid any distortion of the grid.

Careful setting of the depth **of the grid** will allow the front plate to sit perfectly flat and recessed into the wall.

### Interiors

Focus SB utilise various suppliers for the interiors which are supplied with their plates, predominantly used in this range are:

Power outlets and switching modules: The Wandsworth Group LTD

All interiors in this range are designed to run on British Standard 240v current. Non UK standard interiors are available upon specific request, please contact one of product consultants for further details.

### Standards Conformance

All switches are designed and tested to BS EN 60669-1 and are suitable for UK metal flush boxes to BS4662. Boxes, plates and grids must be earthed and if fitted outside the UK permission/approval must be obtained by the local or national electricity supplier and/or approvals authority.

13 amp sockets conform to BS1363

All switches are CE marked and comply with EU safety and health and environmental requirements as required.

All products supplied by Focus SB in this range are in compliance with The EU REACH Directive No 1907/2006 with respect to Substances/Chemical classified as SVHC

### Warranty

Interiors: 12-month manufacturer warranty against product fault

Plates: 12-month manufacturer warranty against product fault

### Quality Accreditation

Focus SB is ISO 9001:2008 registered by ISOQAR registration number 3930

### Country of Manufacture

All Focus SB products are made and produced in England at our factories in St Leonards on Sea.
