**Designed to conform to:**

BS EN 15373: 2007 – Strength, durability and safety for Non-Domestic Seating

Manufactured in accordance to:

ISO 14001: 2004 - Environmental Management Systems.
BS EN ISO 9001: 2008 - Quality Management Systems.

Materials:

Seat produced from injection moulded Styrene Acrylonitrile (SAN). This is a thermoset polymer with a high gloss that is particularly suited to highly transparent or reflective finished products. It is strong and resistant to weathering, scratches, chemical agents, fats, food stains and non-abrasive detergents, making it ideal for café-bar use, where wipe-down surfaces are required. It is also recyclable.

Structural elements are produced from a combination of bent tubular and sheet steel components which are welded and then have a chrome plated finish.

Heritage:

Over thirty years of in-house manufacturing experience of this type of furniture supplied successfully into educational establishments throughout the U.K.

Considerations:

- Available in chair and two bar stool heights
- Available in a selection of shell colours.
- Selected chairs stack up to four units high.
